

Bulk Density ASTM D 1895

Standards

ASTM D 1895 Method A, Method B, Method C

Pictures showing tester for Method A

Application

Measuring systems for determination the bulk density of free flow powder or granulate. The test can provide a gross measure of particle size and dispersion which can affect material flow consistency and reflect packaging quantity.

Features

3 devices are available:

Method A (61-400-011)	Method B (61-400-012)	Method C (61-400-004)
 Used for fine granular material V shaped measuring funnel Capacity of the measuring cup 100 cm³ Stand with funnel shut off 	 Used for more coarse granular material than in method A V shaped measuring funnel Capacity of the measuring cup 400 cm³ Stand with funnel shut off 	 Used or flakes, strands, chips and cut fibres Measuring cylinder 1000 ml capacity Weight plunger for compressing the material Lead shot
